2. Reset the radio-controlled socket with the smoke detector by pressing the side button. Red light must be visible again.

10

### Technical Parameters

- Working Voltage for socket ... 230V~/50Hz 120V~/60Hz
- Transmission frequency ... 433.92 MHz
- Max load current ... 10 A
- Electrical socket format ... Type E (compatible with European socket)

### Package

The full set is composed with :

- Manual and Operation
- Wireless Photoelectric smoke detector A500
- Screws fixation kit
- 2x AA batteries
- Wireless Remote control socket for A500 (model ES9938)

### Conformity

Product : **Wireless Photoelectric Smoke Detector A500**

CE : Certificate Number : **CTL1505201812-EC**

Product : **Remote control socket ES9938**

CE : Certificate Number : **DL-2020051428C**

Compliant with Directive 89/106/EEC(CPD)

EC EMC directive 2004/108/EC

Test standards : **EN 14604:2005+AC:2008**

### Guarantee

The set is under 2 years guarantee in compliance with the Directive (EU) 2019/771. Contact the seller to claim your warranty.

08

11

### Safety

- For indoor use only
- Make sure to avoid strong sunlight, rain and moisture places
- Do not exceed the maximum load current

### Product Description

This product is one wireless remote control socket for the A500 smoke detector. This product only works with the A500 smoke detector wireless model.

### Installation

Plug the Wireless remote control socket into the socket then plug the power supply socket from your device.

09

### Pairing the Socket with the Smoke Detector

1. Plug the socket into the power outlet. Press the side button of the socket until the red light flashes, then release. The light should continue flashing.

2. Activate the detector's test mode by pressing its red button.

3. If the socket light stops flashing, pairing is successful.

4. Check the pairing: arm the socket with its side button and activate the detector's test mode. The red light should turn off.

5. To pair one detector with multiple sockets, repeat steps 1 and 2 for each socket using the same detector.

6. To pair multiple detectors with one socket, repeat steps 1 and 2 with each detector, using the same socket.
